

Rogue River Guides Association

The Rogue River Guides Association would like to express our condolences to the family and loved one's of Tony Haas. Tony was one of our own when it came to guiding customers on the Rogue River. When we needed shuttle service for our rigs she was always there.

This may seem like a simple job but it was only because Tony made it look that way. We are taking clients down river every day somewhere on the river and we need our rigs delivered, on time, when we get to the boat ramp, or a good day might be spoiled.

Not always a simple job when you have a number of guides working the same part of the river, landing at different boat ramps and depending on their rigs being ready to take their customers back to their hotel or their rigs.

Tony was always there for us and dependable as the river going down stream. I don't know how many years Tony shuttled for our members, but I know it was well over twenty years of loyal and honest service. We will miss her humor, high spirit, and dependable service every time we go fishing or rafting.
